SCI 376	GIS for Health, Business, and the Environment	3
SCI 392	Real World Applications for Sustainability and Climate Action	3

A minimum of 12 credits is required for the minor.

Program Goals for the Minor:

- **Foundational Knowledge:** Demonstrate an understanding of key concepts in sustainability and climate action as they relate to business, healthcare, and the environment.
- **Strategic Integration:** Integrate sustainability principles into organizational practices to enhance consumer satisfaction, business profitability, and environmental health.
- **Practical Application:** Apply sustainability strategies through hands-on projects, proposing solutions that improve business operations while promoting environmental stewardship.
- **Ethical Leadership:** Cultivate ethical decision-making skills to advocate for responsible sustainability practices in future professional roles.
